On types of interneurons responding to
visual stimulation present in the optic
nerve of the rock lobster, *Panulirus*
interruptus, 291
- Wood, D. C.: Electrophysiological cor-
relates of the response decrement pro-
duced by mechanical stimuli in the
protozoan, *Stentor coeruleus*, 1
- Yanagisawa, K.: see Wiersma, C. A. G.
- Young, J. Z.: see Wells, M. J.

SUBJECT INDEX, VOLUME 2

- Acetoxycycloheximide (AXM), block of protein synthesis and transport, 368, 383
- AChE and fast axoplasmic transport, 341
- Amino acid, concentration in cortical tissue, 318
- Amino acid production cortical tissue, 311
- ATP and fast axoplasmic transport, 336
- Axoplasmic transport (axonal transport, flow)
 - AChE, 341
 - ATP, 336
 - sugars, 366
 - amino acid translocation, 324
 - crayfish ventral cord, 347
 - azide, 336
 - chondroitin sulfate, 382
 - colchicine, 334, 352
 - cycloheximide, 333
 - mammalian nerve, 331
 - fucose, 367
 - glucosamine, 367
 - glycolipids, 367
 - glycoproteins, 367
 - heparan sulfate, 382
 - iodoacetate, 336
 - local anoxia, 338
 - microtubular protein, 370, 375
 - microtubules, 333, 348
 - neurofilaments, 349
 - ouabain, 342
 - oxidative metabolism, 335
 - peristalsis, 354
 - proline, 379
 - sliding filament, 333, 355
 - sodium cyanide, 335
 - stimulation, 342
 - temperature, 340, 385
 - "transport filament" theory, 333
 - TTX, 342
 - vinblastine, 352
- Azide and fast axoplasmic transport, 336
- Book review—cerebellum evolution and development, 327
- Cerebellar evolution, 327
- Cerebellum, cells of and development, 327
- Chondroitin sulfate, axonal transport, 382
- Colchicine, amino acid distribution, 320
 - binding material, 335
 - block of axoplasmic transport, 334, 352
 - paracrystalline aggregates, 354
- Crayfish ventral cord, axoplasmic transport, 348
- Cross-bridges and microtubules in nerve, 356
- Cycloheximide block of protein synthesis and axoplasmic transport, 333
- Dark discharge rate, crustacean optic nerve fibers, 295
- Depolymerization and colchicine, 354
- "Dimming" fibers (DF's), crustacean optic nerve fibers, 294
- Disto-proximal axoplasmic transport (retrograde) in nerve, 341
- Electrical stimulation, amino acids, 319
- axoplasmic transport, 342
- Fast axoplasmic transport (rapid axonal transport), mammalian nerve, 331
- "Fast movement" fibers (FMF's), crustacean optic nerve fibers, 297
- Fucose, fast axoplasmic transport, 367
- Glucosamine, fast axoplasmic transport, 367
- Glycolipids, fast transport, 367
- Glycoproteins, fast transport, 367
- Goldfish optic system, 364
- Heparan sulfate, axonal transport, 382
- Iodoacetic acid (IAA) and fast axoplasmic transport, 336
- "Jittery movement" fibers (JMF's), crustacean optic nerve fibers, 295
- Lanthanum staining, microtubules, 352
- "Light movement" fibers (LMF's), crustacean optic nerve fibers, 296
- Local anoxia block of fast axoplasmic transport, 338
- "Medium movement" fibers (MMF's), crustacean optic nerve fibers, 297
- Microtubular protein—slow transport, 370, 375
 - and subunits, 355
- Microtubules and fast axoplasmic transport, 333, 348
- "Movement" fibers, crustacean optic nerve, 295
- Multimodal fibers with unidirectional visual input, crustacean optic nerve, 303
- Multimodal fibers, crustacean optic nerve, 300
- Neurofilaments and axoplasmic transport, 349
- Neuronal proteins, turnover in nerve, 387
- Optic ganglia, crustacean, 291
- Optic nerve fibers, crustacean
 - dark discharge, 295
 - dimming (DF's), 294
 - "fast movement" (FMF's), 297
 - "jittery movement" (JMF's), 295
 - "light movement" (LMF's), 296
 - "medium movement" (MMF's), 297
 - "movement," 295
 - multimodal, 303
 - "seeing" (SeF's), 298
 - "space-constant" (SpCF's), 300
 - "sustaining" (SuF's), 294
 - unidirectional movement (UMF's), 301
- Optokinetic motor fibers, 304
- Ouabain and fast axoplasmic transport, 342

- Oxidative metabolism and fast axoplasmic transport, 335
Paracrystalline aggregates in nerve, 354
Particulates and transport, 370
Peristaltic waves and axoplasmic transport, 354
Phosphocreatine in nerve, 336
Phosphoglyceraldehyde dehydrogenase, 336
Polysaccharides and axonal transport, 367
Proline and axonal transport, 379
Puromycin, block of protein synthesis and transport, 333
Rapid axonal flow (fast axoplasmic transport), 362, 279
Ruthenium red, polysaccharides on microtubules, 352
"Seeing" fibers (SeF's crustacean optic nerve fibers, 298
Signal substance and retrograde transport, 341
Sliding filament mechanism and axoplasmic transport, 333, 355
Slow axonal flow (slow axoplasmic transport), 379
 and microtubular protein, 370
Slow axoplasmic flow, 361
Sodium cyanide and fast axoplasmic transport, 335
"Space-constant" fibers (SpCF's), crustacean optic nerve fibers, 300
Sulfated mucopolysaccharides, axonal transport, 382
"Sustaining" fibers (SuF's), crustacean optic nerve fibers, 294
Temperature and axonal transport 340, 385
"Transport filament" theory fast axoplasmic transport, 333
Tubulin-microtubular protein, 355
Turnover nerve protein, 387
TTX and fast axoplasmic transport, 342
Unidirectional movement fibers (UMF's) crustacean optic nerve fibers, 301
Vinblastine block of axoplasmic transport, 352
Vinblastine, microtubules, 354
